#### **About the Topic:**

The 529.45 km Silver Line connecting Thiruvananthapuram and Kasargode reduces the total travel time to less than 4 hours, compared with the present 10 to 12 hours. Though there are economic benefits, social benefits, environmental benefits and health sector benefits, there are many concerns in the minds of the people of Kerala regarding its implementation and other related matters. This seminar is aimed towards giving the true perspective about the project. All facts about the project including the latest news will be discussed and debated through this interactive session.
